## LUT

Simulação:

```
xcelium>
xcelium> source /apps/eds/installs/XCELIUM2503/tools/xcelium/files/xmsimrc
xcelium> database -open waves -into waves.shm -default
Created default SHM database waves
xcelium> probe -create -shm tb_seno_operation.phase tb_seno_operation.seno
Created probe 1
xcelium> run
===== INICIO DOS TESTES =====
OK | phase = 0 | seno = 0000
OK | phase = 10 | seno = 1639
OK | phase = 20 | seno = 2bc7
OK | phase = 30 | seno = 4000
OK | phase = 40 | seno = 5247
OK | phase = 50 | seno = 620c
OK | phase = 60 | seno = 6ed9
OK | phase = 70 | seno = 7848
OK | phase = 80 | seno = 7e0e
OK | phase = 90 | seno = 8000
OK | phase = 5 | seno = 0000
OK | phase = 15 | seno = 0000
OK | phase = 25 | seno = 0000
OK | phase = 33 | seno = 0000
OK | phase = 99 | seno = 0000
OK | phase = 120 | seno = 0000
OK | phase = 255 | seno = 0000
===== FIM DOS TESTES =====
Simulation complete via $finish(1) at time 170 NS + 0
./Seno_operation_tb.v:60 $finish;
